

FLEET MAINTENANCE SECTION
2608 Centerforce Dr
Prescott AZ 86301

Bring your fleet of fire department vehicles to us for repairs at our state of the art facility or call for a mobile mechanic to do repairs in the field. We work on all vehicles, big or small, from the oldest pumpers to the latest, most advanced vehicles in the industry. Our technicians hold numerous certifications in automotive and fire apparatus repair, including ASE and EVT certifications, and have over 100 years of combined experience. We specialize in all types of repairs and fabrication including the following:

- Gas and diesel repair and overhaul
- Manual and automatic transmission repair and overhaul
- Suspension and brake work
- Air and hydraulic systems
- Transfer case and rear end repairs
- Aerial ladder and foam systems
- Engine, transmission, pump and foam system computer controls
- Electrical repairs and installation of warning systems, vehicle lighting and special radio installs
- In-house or mobile fabrication and welding for mild steel, aluminum, stainless or plastic
- New compartments, modifications, equipment mounting or storage, tank repairs or replacement
- Pump repairs or rebuilds, pump testing, flow tests, plumbing repairs and modifications, foam system installs or repairs
- We specialize in custom work. No job is too big or too small!

We offer preventative maintenance to suit your needs.
